STATEMENT OF WORK FOR THE STANDARDIZED BARE BASE LAUNDRY FACILITY Inspect Repair Only As Necessary (IROAN) NSN 3510-01-165-6845

- 1.0 <u>SCOPE</u>. This Statement of Work (SOW) establishes and sets forth tasks and identifies the work efforts that shall be performed by the Contractor in the IROAN effort of the **Standardized Bare Base Laundry Facility**, hereafter referred to as the **Laundry Unit**. This document contains requirements to restore the **Laundry Unit** to Condition Code "A." Condition Code A is defined as "serviceable/issuable without qualification, new, used, repaired or reconditioned materiel which is serviceable and issuable to all customers without limitation or restriction. Includes materiel with more than 6 months shelf-life remaining." National Stock Number (NSN) 3510-01-165-6845 shall be known as the **Laundry Unit**, **Bare Base**.
- 1.1 <u>Background</u>. IROAN is defined as "That maintenance technique which determines the minimum repairs necessary to restore equipment components or assemblies to prescribed maintenance serviceability standards by utilizing all available diagnostic equipment and test procedures in order to minimize disassembly and parts replacement."
- 2.0 <u>APPLICABLE DOCUMENTS</u>. The following documents form a part of this SOW to the extent specified. Unless otherwise specified, the issues of these documents are those listed in the Department of Defense Index of Specifications and Standards (DoDISS) and supplement thereto which is in effect on the date of solicitation. In the event of conflict between the documents referenced herein and the contents of this SOW, the contents of this SOW shall be the superseding requirement.

2.1 Military Specifications

MIL-C-46168 Coating, Aliphatic Polyurethane, Chemical Agent Resistant

MIL-C-53039 Coating, Aliphatic Polyurethane, Single Component, Chemical Agent Resistant

2.2 Military Standards

MIL-STD-129 DoD Standard Practice for Military Marking

MIL-STD-130 Identification Marking of US. Military Property

MIL-STD-461 Requirements for the Control of Electromagnetic Interference Characteristics of Subsystems and Equipment

MIL-STD-2073-1D DoD Standard Practice for Military Packaging

Copies of military specifications and standards are available from the DOD Single Stock Point, Docment Automation and Production Service, Building 4/D, 700 Robbins Avenue, Philadelphia, PA 19111-5094, Telephone (215) 697-2179 or DSN 442-2179, or http://www.dodssp.daps.mil. Copies of other government documents and publications required by contractors in connection with

specific SOW requirements shall be obtained through the contracting officer: Commander, Marine Corps Logistics Bases, (Code 891) Attn: Contracting Officer, 814 Radford Blvd., Albany, Georgia 31704-1128, commercial telephone number (229) 639-6753 or DSN 567-6753. Copies of engineering drawings, if applicable, shall be obtained from Life Cycle Management Center, Attn; Code 851-3, 814 Radford Blvd STE 20320, Albany, Georgia 31704-0320, commercial telephone number (229) 639-6410 or DSN 567-6410.

3.0 REQUIREMENTS

- 3.1 General Tasks. In fulfilling the specified requirements, the Contractor shall:
- a. Provide materials, labor, facilities, missing parts, and repair parts necessary to inspect, diagnose, restore, and test the **Laundry Unit**. Upon completion of IROAN, repaired equipment shall be Condition Code "A".
- b. Provide all tools and test equipment required to test, inspect, repair, and calibrate the **Laundry Unit**.
- c. Conduct in-process and final on-site testing for witness by an MCLB(Code 837-1), Albany, representative.
- d. Be responsible for all structural, electrical and mechanical requirements associated with the restoration of the **Laundry Unit**.
- 3.2 <u>Detail Tasks</u>. The following tasks describe the different phases for IROAN of the **Laundry Unit**.
- 3.2.1 <u>Phase I Pre-induction</u>. The Contracotr shall perform a pre-induction inspection analysis for each **Laundry Unit** using the Contractor's diagnosis, inspection and testing techniques to determine extent of work and parts required. This inspection shall include all items associated with the **Laundry Unit** as found in TM 09950A-14/1 M/S, TM 09950A-14/1 M/S CH00A, TM 09950A 14/1 M/S Supplement 1 and SL-3-09950A. These findings shall be annotated on a Pre-Induction Checklist (Appendix A-1) and shall be provided to the government in accordance with Paragraph 4.0 of this SOW.
- 3.2.2 <u>Phase II IROAN</u>. After pre-induction tests and inspections have been completed, repair of the **Laundry Unit** shall be accomplished in accordance with this SOW. Deficiencies noted on the Pre-Induction Checklist during Phase I shall be repaired/replaced. Components or assemblies shall not be disassembled for replacement of mandatory parts unless that part has failed, or the component assembly wherein the part is located is disassembled for repair.
- a. Pre-Induction Checklist Information recorded on the Pre-Induction Checklist report shall be used as a guide to repair the **Laundry Unit** system in accordance with this SOW.
- b. Technical Instruction (TI) All TI's not previously applied to the **Laundry Unit** shall be applied during the IROAN and shall be annotated on Equipment Record Jacket in accordance with TM 4700-15/1H.

- c. Corrosion For corrosion prevention and treatment use TM 3080-12 and TM 3080-50.
- d. Fluid Leaks The following shall be used as a guide in determining degree of fluid loss:
- (1) Class I Seepage of fluid (as indicated by wetness or discoloration) not great enough to form drops.
- (2) Class II Leakage of fluid great enough to form drops, but not enough to cause drops to fall from the item being checked/inspected.
- (3) Class III- Leakage of fluid great enough to form drops that fall from the item being checked/inspected.

NOTE:

A Class I Leak, except in fuel or brake systems, is an acceptable condition at any time and does not require corrective action.

- e. Belts Replace all.
- f. Data Plates All required data plates and decals shall be in place and shall be legible. Each repaired **Laundry Unit** shall have an IROAN data plate affixed to the main unit in close proximity to the existing data plate. The data plate shall meet the requirements of MIL-STD-130 and TM 4750-15/2.
- g. Painting/Coating (Exterior/Interior) If painting/coating is required, refer to TM 4750-15/1 and TM 4750-15/2. The **Laundry Unit** shall be cleaned in accordance with TM 3080-50, Chapter 4, and coated with Aliphatic Polyurethane Coating, in accordance with MIL-C-46168 or MIL-C-53039.
- h. Demilitarization All end items that are identified as non-repairable and require demilitarization codes, shall be reported to the Marine Corps Logistics Bases representatives Code 837-1, who will provide disposition instructions in accordance with DOD 4160.21-M-1.
- i. Electromagnetic Emission All requirements pertaining to control of electromagnetic interference, emission and susceptibility shall be in accordance with MIL-STD-461.

i. Hardware

- (1) Replace broken, unserviceable and/or missing hardware including nuts, bolts, screws, washers, turnlock fasteners, mandatory replacement items, safety, and one-time use items, etc., in accordance with TM 09950A-14/1 M/S and SL-3-09950A. Unserviceable would include any of the above that failed to function properly.
- (2) Ensure proper hardware locking devices are present and operational on all moving mechanical assemblies.

- (3) Hardware normally supplied with commercial parts shall be used unless specifically prohibited.
- k. Hoses All hoses and fittings shall be visually inspected for damage or deterioration. Any hose showing signs of leakage, kinking or separation of outer coating shall be replaced. This inspection shall be performed during the Pre-induction inspection of the **Laundry Unit**.

1.Cable Assemblies - All cables and cable connections shall be tested and visually inspected for damage or corrosion. Any cable or cable connector showing signs of damage, corrosion or separation of outer coating shall be repaired/replaced and tested with it's respective component/assembly to assure satisfactory compliance with all operational tests.

m. Filters - Replace all.

3.2.3 Phase III - Inspection, Testing and Acceptance

- a. Inspection, Testing and Acceptance of the **Laundry Unit** shall be conducted in accordance with TM 09950A-14/1 M/S.
- b. The Contractor shall be responsible for conducting required tests and shall ensure all necessary personnel are available to complete the final acceptance. Acceptance tests shall be held at the Contractor facility. MCLB (Code 837-1), Albany, Georgia, representatives shall be given a minimum of two weeks notice prior to beginning acceptance testing. The test area shall be cleared of all equipment parts, components, etc., not required for the test.
- c. The Contractor shall be responsible for correcting any deficiencies identified during inspection/testing. MCLB (Code 837-1), Albany, Georgia, representatives may require the Contractor to repeat tests or portions thereof, if the original tests fail to demonstrate compliance with this SOW.
- d. Acceptance testing on all **Laundry units** repaired under the provisions of this SOW shall be accomplished in accordance with TM 09950A-14/1 M/S. Operational Tests are to be conducted on each **Laundry Unit** upon completion of repairs and prior to the equipment being returned to stock, to insure the unit will perform as required.

3.2.4 Phase IV - Packaging, Handling, Storage, and Transportation (PHS&T).

- a. The contractor shall be responsible for the preservation and packaging of items being repaired under the terms of this statement of work. Items scheduled for long term storage or shipment to overseas destinations shall be in accordance with the Level "A" requirements of MIL-STD-2073-1D, Method 10. Items being scheduled for domestic shipment, immediate use or short-term storage shall be to Level "B" requirements.
 - b. Marking shall be in accordance with MIL-STD-129.
- c. The Marine Corps will provide the contractor with the shipping address(es) for delivery of the repaired equipment. The contractor shall be responsible for arranging for shipment to the pre-

designated site(s). The Marine Corps will be responsible for the transportation costs associated with shipping the subject equipment to and from the Contractor.

3.3 Configuration Management

3.3.1 Configuration Status Accounting (CSA).

- a. The Contractor shall record and submit data on retrofit accomplished during Phase II. Any approved Modification Instructions (MIs) or Engineering Change Proposals (ECP's) not previously applied shall be applied during Phase II of the IROAN process.
- b. The Contractor shall determine the application status of approved configuration changes by visual inspections to the extent possible. The government will identify the configuration changes to be inspected by furnishing a Configuration Inspection Checklist to the Contractor. The Contractor shall use one checklist per **Laundry Unit** to record their inspection findings along with other required data.
- c. The Contractor shall record serial numbers of the assemblies listed on the Configuration Inspection Checklist. The Contractor shall record the information on the same form that was used to record the application status of configuration changes.
- 3.3.2 <u>Configuration Control</u>. The contractor shall apply configuration control procedures to established configuration items. The contractor shall not implement configuration changes to an item's documented performance or design characteristics without prior written authorization. If it is necessary to temporarily depart from the authorized configuration, the contractor shall prepare and submit a Request For Deviation. MIL-HDBK-61 (paragraph 4.3 and Table 4-9) and ANSI/EIA-649 (paragraph 5.3.4) provide guidance for preparing this configuration control document.
- 3.4 Quality Assurance Provisions. The Contractor shall provide and maintain a Quality System that as a minimum, adheres to the requirements of ANSI/ISO/ASQC Q9002-1994, Quality System Model for Quality Assurance in Production, Installation, and Servicing. The program shall ensure quality throughout all areas to include processing, assembly, inspection, test, maintenance, and preparation for delivery and shipping. Unless otherwise specified in the contract, the Contractor shall be responsible for performance of all inspection requirements. The Government MCLBA (Code 837-1) reserves the right to perform any of the inspections set forth in the contract where such inspections are deemed necessary to assure products and services conform to the prescribed requirements. The Contractor shall provide an Inspection and Test Plan.
- 3.5 Government Furnished Equipment (GFE)/Government Furnished Materiel (GFM). GFE is government owned equipment authorized by contract for use by a Commercial/Government contractor. It is neither consumed during production nor incorporated into any product. GFM is materiel furnished to a contractor that will be consumed during the course of production or incorporated into product being manufactured/remanufactured under a contract/statement of work. In the event the Marine Corps does have GFE/GFM requirements the Management Control Activity (MCA/Code 827-2), Marine Corps Logistics Bases, Albany, Georgia, will coordinate required GFE and will maintain a central control on Marine Corps assets in Contractor's possession. The MCA

will forward a GFE Accountability agreement to the Contractor Facility for signature to establish a chain of custody and property responsibilities for Marine Corps assets.

- 3.6 <u>Contractor Furnished Materiel (CFM)</u>. The Marine Corps has adopted the Navy's procedures regarding Contractor Furnished Materiel (NAVICPINST 4491.2A). In the event that Contractor Furnished Materiel is required for repair parts, the contractor shall requisition through the DoD Supply System. DOD 4000.25-1-M,(MILSTRIP) Chapter 11 authorizes contractors to requisition through the DoD Supply System.
- 3.7 Acceptance. The performance of the Contractor and the quality of work delivered, including all equipment furnished and documentation written or compiled, shall be subject to in-process review and inspection during performance. Inspection may be accomplished in-plant or at any work site or location, and Marine Corps representatives (Code 837-1) shall be permitted to observe the work or to conduct inspection at all reasonable hours. Final inspection and acceptance testing shall be conducted at the Contractor. Final acceptance shall be conducted on 100 percent of items to verify that the units meet all requirements.
- 3.8 <u>Rejection</u>. Failure to comply with any of the specified requirements listed herein shall be reason for rejection by MCLB (Code 837-1), Albany, representative. The Contractor shall, at no additional cost to MCLB, Albany, Georgia, provide the following:
 - a. Develop an approach for modification or correction of all deficiencies.
- b. Upon approval of a documented approach, the Contractor shall correct the deficiencies and repeat the verification until an acceptable compliance with acceptance test procedures is demonstrated.
- 4.0 <u>REPORTS</u>. All report deliverables shall be submitted in hard copy to Commander (Code 837-1), Marine Corps Logistics Bases, 814 Radford Blvd., Suite 20320, Albany, Georgia 31704-0320, unless directed other wise in a Contract Data Requirements List.
- 4.1 <u>Repairable Item Inspection Report</u>. The Contractor shall provide a Repairable Item Inspection Report for each **Laundry Unit**. The report shall be identified by United States Marine Corps Serial Number.
- 4.2 <u>Monthly Progress Reports</u>. The Contractor shall provide Monthly Progress Reports summarizing the progress and status of the IROAN Program.
- 4.3 <u>Pre-Induction Checklist</u>. The Contractor shall complete the Pre-Induction Inspection Checklist for each **Laundry Unit** repaired. These documents shall be available during final acceptance testing. One copy of each document shall be provided to MCLB, Albany, Georgia, Code 837-1, after final acceptance of the **Laundry Unit**.
 - a. The inspection checklist shall contain, but not be limited to the following:
 - (1) Laundry Unit serial number. Appendix A-1
 - (2) Condition Code of Laundry Unit at receipt. Appendix A-1

- (3) Results of operational test. Appendix A-1
- (4) List of defective parts and assemblies. Appendix B-1
- (5) List of repair parts and assemblies required for repairs. Appendix C-1
- (6) Corrosion prevention methods that shall be used. Appendix A-1

PRE-INDUCTION CHECKLIST

Appendix A-1

Serial number:	Condition Code at receipt:	
Results of operational test:		
List of defective parts and assemble Corrosion prevention methods t	ies required for repairs. Appendix C	

Inspect all components for operating/malfunction/defective parts per TM 09950A-14/1 M/S. Visually check components for leaks, damage, loose parts & hardware. No disassembly of components is allowed unless the component is determined to be defective.
